## Partner with experience and reliability for your turning requirements

B&D Manufacturing ensures that customers are 100% satisfied with the products and services that they offer. Recently they have complimented their CNC milling and turning capabilities by acquiring a new state-of-the-art Mori Seiki SL 403 Computerized Numerical Control (CNC) lathe.

Customers are finding the combined expertise of B&D machinists and their advanced turning capabilities are producing quality and consistency that surpasses other machine shops in the north.

This lathe is capable of producing one-of- parts or large volume production runs efficiently and cost-effectively.

This machine is ideal for producing parts like railcar wheels, gear blanks, pump parts, axles, large shafting and tramcar wheels to name a few. With a 40 horsepower motor and spindle bore of 5" this lathe can turn parts up to 26" in diameter by 80" long.

"Our job is done when our customers are 100% satisfied with the products and services we provide them," states Mike Luttrell, General Foreman, B&D Manufacturing.

The industry demanded a service and B&D responded by procuring this piece of equipment.

To learn more about the many possibilities for all your turning and machine shop requirements, call Mike Luttrell for suggestions and pricing.

## Wheel Handler

Handling heavy equipment wheels for installation or removal can be safer and more productive for your organization. Reduce downtime and keep your people functioning. In tight situations, where space is limited or for any types of equipment that have massive wheels that need handling, the B&D Wheel Handler is a must have for your operation.

This product has only been available for just over one year and there is nothing else like it on the market. This is an engineered product and B&D can custom design and manufacture mounting hubs to suit practically all of your equipment. All you need to provide is the information from the equipment's "Handler Hub Specification Sheet".

### Order today

**Customer service:** Claude Perreault or Greg Zinn

**Technical service:** Robin Zola

### Mounting hubs:

*8585-4879-H2 -fits wheels for:*

Wagner ST8B, Toro 1400, Toro 40T, EJC 430, JDT 426, Elphinstone R1700.

*8585-4879-H3 -fits wheels for:*

Elphinstone R1300.

*8585-4879-H4 -fits wheels for:*

CDT 1604.

*8585-4879-H5 -fits wheels for:*

Elphinstone R1600G.

## Hydraulic Thimble Forming Device

For "thimble type" mine hoisting attachments, the B&D Hydraulic Thimble Forming Device can help keep workers out of harm's way and contribute to improving production at your operation during the recapping process.

Where tasks and equipment are large and people are small, you cannot do without a B&D Hydraulic Thimble Forming Device. You have a huge responsibility to your workers and company; this one-of-a-kind apparatus will help improve safety and keep your operation running smoothly by automating this task.

This is a B&D custom built product and can be modified to suit your specific requirements.

### Order today

Reduce risk and provide your workers with equipment that helps them to perform their heavy-duty responsibilities safely and efficiently.
