Cost savings for your operation with B&D Adjustable Boom Stands

B&D Manufacturing continues to design and develop solid products to help their customers operate more efficiently and reduce costs whenever possible.

Just new for 2005, the B&D Adjustable Boom Stand is one such product.

This adjustable stand is made of lightweight heavy-duty aluminum so not only is it easy for one worker to handle, but it is guaranteed to last for years.

What makes this product so efficient is that it can be adjusted to accommodate different machinery with models adjustable from 48" to 60" and 60" to 90". This means less boom stands required at one site which translates to cost savings.

It is engineer certified to 10,000 lbs. With a safety rating factor of 5.

With B&D equipment you will be assured that your crew has leading edge and dependable equipment to keep them productive, efficient and safe.

Fast and simple - lock out pipe valves

This ingenious tool is now available for all those work sites where it is imperative to control flow regardless of what it might be.

For security and safety reasons this "Valve lock-out tool" can easily be installed and locked. The locking ability is available when the valve is in open positions to control flow or can be locked to completely shut the flow off.

Made from non-corrosive, lightweight, heavy-duty aluminum, it comes in either a 2" or 4" size.

Improve safety and save time when changing tires

When your crew needs to change heavy equipment tires they need to do it safely and quickly. The B&D Tire Changer makes this task easier than ever before.

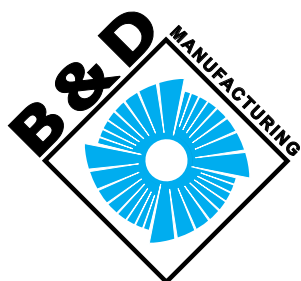

It is designed so that the operator is always above the load. This helps eliminate the risk of a tire falling back toward the operator. To make it simple to align the valve stem and spindle bolts during installation, the tire can rotate a complete 360 degrees with our built in roller system design.

Engineer certified for 3000 lbs., ensure that your crew is changing tires safe and fast.
