September 2005
Volume 2- Issue 2

In this Issue:

- BDS WipChip and other new technologies are now available!
- B&D Solutions now offering seminars to upgrade your staff.
- Congratulations - Award winning technical paper

B&D Solutions' NEW industry memberships

- PAPTAC - (Pulp and Paper Technical Association of Canada) Sustaining Member
- PAPTAC - Midwest Branch
 - PACWEST - Pacific-Coast Branch

- TAPPI - (Technical Association Pulp and Paper Industry) Sustaining Member
- MOTG-North (Millyard Operators Technical Group)
- Process and Product Quality
 - Pulp Manufacture Divisions
- Standard-Specific Interest Group

B&D Solutions launching new technologies

Acquiring the exclusive distribution rights to the **BDS WipChip** powered by WipWare, B&D Solutions, a division of B&D Manufacturing now offers this revolutionary technology to help improve efficiencies in the pulp & paper and forestry industries. Implementation of this ground-breaking system can lead to major cost and time savings in your operation.

Working with Domtar-Espanola, the **BDS WipChip** system received independent validation for this state-of-the-art module that enables "woodchip sizing classification" on-line, in real-time while dynamic machine control remains totally non-intrusive to production and is now moving to the alpha testing stage.

B&D Solutions is currently working with Domtar-Espanola as the development site for beta testing of a second vision based module, "**White Wood Loss**".

B&D Solutions provides the highest quality of service and commitment to their customers. They strive to help companies achieve their profit targets and operation goals by introducing innovative ideas that will always give you an edge over your competition.

B&D Solutions management - educating industry

Now offering seminars to upgrade or educate your staff or students, Clinton R. Thomson, Director Business Development & New Technologies and Wayne Desormeau, Manager are making significant educational contributions about new technologies to the pulp & paper and forestry industry.

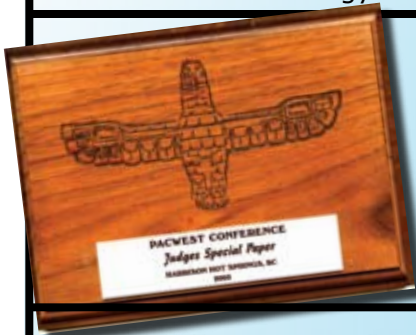

To ensure your employees industry knowledge is current and applicable to improve your operation book one of these information seminars today.

- BDS WipChip powered by Wipware - Online wood chip classification process control
- BDS Wear & Impact Program powered by Northern Enable - Hog Fuel Production Economics - Hog mill optimization
- BDS MoistScan powered by Callidan - Dynamic, online moisture measurement of wood chips using patented microwave technology

Award winning technical paper

We would like to congratulate Clinton on his technical paper "Woodchip Optimization - Dynamic On-Line Woodchip Classification" that won the "Judges Special Paper" award at the PAPWEST Technical Conference in Harrison Hot Spring, British Columbia.

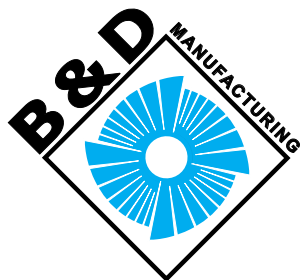

More innovative technology coming

B&D Solutions has also acquired the rights for two proprietary technologies unique to the forestry industry, the patented:

- **MoistScan Microwave** technology, powered by Callidan Instruments, that is capable of dynamic moisture measurements; and
- **Air/Oil Lubrication**, powered by INTEK, that replaces grease points with a self contained non-contaminating lubrication system.

For more information about how these systems can improve your operation contact: Wayne Desormeau
