Safety first - Lock the "mechanical type" dipper door open

The entire purpose of the B&D Dipper Safety Wedge is to save lives. Temporary welded contraptions designed to keep the shovel door open have occasionally failed and as a result workers' lives have been lost and are currently still at risk.

For the safety of your crew servicing dippers on your site, this dependable device is a must have. The B&D Dipper Safety Wedge is designed to lock the dipper door open for servicing and is:

- safe and reliable;
- simple to install and it comes with written recommended Standard Operator's Procedures for complete worker training; and
- easy for workers to handle as it is made of light-weight aluminum.

Don't run the risk of lives being lost servicing dippers on your site. Get your supply of the B&D Dipper Safety Wedges today.

Protect those valuable cables on your busy site

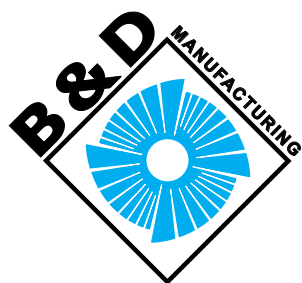

On busy sites, machinery is always travelling over cables. This can be hazardous to the life of the cables and to the heavy vehicles that need to cross them.

B&D Manufacturing once again has a simple and effective solution, the B&D Cable Hose Protection System. This system:

- is a modular locking design available in 4 ft. lengths made of light-weight aluminum that are easy to move around;
- protects valuable cables up to 3" round; and
- is weather and abrasion resistant.

No other system matches the B&D Cable Hose Protection System for safety and ease of use. Contact B&D today to get yours.
