

News you can use

December 2006
Volume 3- Issue 4

In this Issue:

- Super Jack now available
- Underslug Platform to transport people to shaft bottom
- B&D Manufacturing building brand new facility to bring all operations to one locale

B&D is pleased to welcome AMS as one of our distributors in Nevada. AMS will be a valuable asset to providing access to B&D products in Nevada and the surrounding states.

B&D declared one of "5 Great Places To Work"

In the October 2006 issue of Northern Ontario Business, B&D Manufacturing has been honoured as one of 5 companies in North-eastern Ontario as a great place to work.

Andre Ruest, general manager, quoted in the article says, "I've always stressed that if it wasn't for the people that we have, we wouldn't be where we are today."

Super Jack on a safety mission

The B&D Super Jack was engineered and built by B&D with safety being priority number one. In addition, it also decreases maintenance time translating into increased production.

When maintenance is required on your fleet, this sturdy and dependable device can lift and secure the largest haulage trucks in the world. The B&D Super Jack enables workers to perform the required maintenance to your vehicles in a secure and safe environment.

Easy to operate requiring only one individual, the Super Jack can perform it's task in five simple steps.

1. Drive the Super Jack into position
2. Hydraulically lift the truck
3. Hydraulically insert locking pins.
4. Mechanically lock pins.
5. Perform tag and lock-out procedure.

The Super Jack can double as a safety stand while the work is being done on the truck or if you need to use it to lift another vehicle, just simply replace it with a pair of B&D 100 Ton Safety Stands.

The Super Jack is a fully computer controlled, hydraulically driven vehicle. It can sense the characteristics of the lift with a feedback screen that enables the operator to visually monitor the vehicle tonnage, tilt and limits.

It can be custom fit to accommodate your fleet.

Where equipment is massive and people are small you need to add a B&D Super Jack to your operation today.

Transport workers safely and easily to shaft bottoms

When workers and equipment need to be transported to the shaft bottom for inspections or repairs, count on B&D's Underslung Platform to take them comfortably, safely and easily. The unique B&D Underslung Platform can transport four individuals.

The platform can be simply installed by suspending and attaching four slings under the conveyance and positioning and locking the cam wheels to shaft guides. Made with lightweight, heavy-duty aluminum and engineer certified, installation is quick and simple on conventional or Copey hoists for skips and cages.

For safe and easy transport of your workers, get your B&D Underslung Platform today.

B&D moving to brand new facility in 2007

B&D Manufacturing has officially broke ground and the construction of their brand new, state-of-the-art 46,000 square foot facility is underway.

The new building will enable B&D to bring all of their current operations under one roof. This will enable B&D to more efficiently serve its growing and diverse customer base.

B&D will be holding an open-house to showcase their new space later in 2007 so look for details in future issues of News You Can Use.
