September 2008
Volume 4- Issue 1

In this issue:

- New product line for Truck & Shovel segment
- Dial Tool Adjuster for Portable Align Boring Machines
- B&D now distributes J&J Manufacturing safety products

B&D is pleased to welcome SMS Equipment (previously known as TransWest Mining) as a new business alliance.

SMS Equipment offers new Komatsu and Sandvik mining equipment, as well as a variety of used equipment of all makes and models. SMS Equipment provides 24 hour parts and service to support the mining equipment.

New Safety & Tooling product line for Truck & Shovel market

With over 28 years experience in ground-breaking product engineering, B&D is again expanding into a new market with the introduction of a diverse line of original Safety and Tooling products supporting the Truck & Shovel market.

B&D has been steadily building on a stellar reputation in the global marketplace as a result of the development and/or distribution of products like the:

- B&D Portable Align Boring Machine;
- B&D Super Jack;
- B&D Rod Handler;
- B&D Work Platforms;
- Aluminum heavy duty stands;
- Aluminum wheel chocks;
- Vision Systems; and
- Microwave Moisture Meters.

As a result of a world-wide reputation and distribution system, B&D is poised for further expansion. Over the last five years, B&D has been recruiting a select team of mechanical, electrical, and hydraulic engineering professionals.

This dedicated Research and Development group has been responsible for a broad range of original and custom commissioned products.

Geared for improving the safety conditions for Truck & Shovel maintenance personnel, B&D has recently introduced a new line of Safety and Tooling products that include the:

- B&D Swing Shaft Changer for the P&H Shovels,
- B&D Wheel Motor Handler; and
- B&D Grid Box Lifting Beam.

In October, B&D will be launching adaptor options for the Wheel Motor Handler which will include the:

- Front Strut Removing Tool;
- Rear Strut Removing Tool; and
- Dump Box Hydraulic Cylinder Removing Tool.

Making align boring even easier - B&D's Dial Tool Adjuster

Making an accurate cut is critical when align boring. With measured accuracy, the unique B&D Dial Tool Adjuster enables you to adjust the tool bit lengths to within 1000th of an inch. With this level of precision, you can be sure to machine the bore correctly every time. When production deadlines are tight you don't have time to second guess. In addition, the DTA-2700 was made for rugged handling.

Using the DTA-2700 is easy. Just fit it over the tool bit and rest it against the boring bar. Clamp the tool bit to the DTA-2700 by tightening a set screw. Make a note of the measurement on the gauge, or zero it. Release the tool bit from the boring bar, by loosening the set screw. Turn the knurled brass nut to pull the tool bit out from the boring bar. The distance is measured by the gauge. Relock the tool bit in the boring bar at the desired new distance. Release the DTA-2700 from the tool bit and lift it off.
